IT aspects of developing a survey for judges and court staff

Electronic resources used

- an open electronic platform was used for the survey

The system used creation and running the survey:

LimeSurvey

"The worldwide leading open source survey software as a professional SaaS solution or as a self-hosted Community Edition." (https://www.limesurvey.org)

Multilingual	28 different question types	Visualize your response data	Anonymized responses - protected participants
Supporting more than 80 languages	We have them all!	Create statistics and graphs inside the application	

The Survey sections and opportunities

- choose the answer
- leave their answer
- leave a comment
- to evaluate the usefulness of the proposal on a five-point scale

10%

0. Characteristics of the interviewee

D) I work in a city of:
❶ Choose one of the following answers
- ○ Less than 50 000 people
- ○ Between 50 000 and 150 000 people
- ○ Between 150 000 and 500 000 people
- ○ More than 500 000 people
- ● No answer
